DETAILED ACTION

Election/Restrictions

Applicant's election of claims 1-20 in Paper No. 4 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Therefore, claims 1-20 are prosecuted whereas claims 21-35 have been canceled.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "butt hinge" in claim 1, the "affixing device" in claims 2, 3 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: through the specification, --complicate -- should be -- complicated --.

Appropriate correction is required.

Claim Objections

Claim 12 is objected to because of the following informalities: -- pate—should be
– plate—in line 1. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by
Matsuoka et al.

Regarding claim 1, Matsuoka et al disclose on figure 2 a liquid crystal display monitor with esthetic back comprising an LCD panel 100 having a first surface and a second surface against the first surface wherein the first surface has a displaying portion 101; a front housing 1010 covering the first surface of the LCD panel and exposing the displaying portion; a back housing 220 covering the second surface of the LCD panel; a base 2010 engaged with the back housing by a butt hinge such that the LCD panel with respect to the base in angle can be adjusted; and a back cap 1020 having an about planar outer surface, the back cap covering the back housing wherein the back cap includes a metallic material.

Regarding claims 2-10, Matsuoka et al discloses on figure 2 all the structures set forth in the claimed invention.

Regarding claim 11, Matsuoka et al disclose on figure 2 a back cap 1020 of liquid crystal display screen suitable for use in an LCD monitor, the LCD monitor comprising a screen body 100 and a holding part 2010 coupled with the screen body, the back cap of LCD screen comprising a plate body having a shape about conformal to an appearance of the screen body, the plate body having an outer surface being about planar wherein the plate body includes a metallic material; and sidewall connecting to the plate body at a rim and about being perpendicular to the plate body wherein the sidewall can be connected to an outer periphery of the screen body.

Regarding claims 12-20, Matsuoka et al discloses on figure 2 all the structures set forth in the claimed invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Pub 2002/0126236 A1 to Hiratsuka et al disclose a display panel.
